

BENJAWAN CHOMPOOTEPA

☎ 080-9439899 ✉ benjawanchtp@gmail.com 🌐 github.com/benjawanchtp 📍 Lampang, Thailand

Computer Science graduate with a strong foundation in Artificial Intelligence, Machine Learning, and NLP. Demonstrated success in optimizing Deep Learning models to achieve 98.77% accuracy and analyzing system robustness using Python and TensorFlow. Passionate about developing models and leveraging LLMs to solve complex real-world problems

WORK EXPERIENCE

Research Internship – Advanced Institute of So-Go-Chi Informatics (RIEC)

Nov 2025 - Feb 2026

Tohoku University, Japan

Focus 1: Aspect-Based Sentiment Analysis (ABSA)

- **Developed** ABSA models using BERT, RoBERTa, BART, and T5 architectures, **increasing** accuracy from 88.60% to **98.77%** through ETL processes and rigorous manual data denoising
- **Architected** a Multi-task Learning pipeline with T5-base, **outperforming** prefix-based methods in simultaneous sentiment and topic extraction
- **Optimized** performance using **Optuna** and **validated** stability via **K-Fold (K=1, 3)**, achieving consistent F1-scores of **97%**

Focus 2: LLM Robustness & Trustworthy AI

- Evaluated In-context Learning (ICL) in open-source LLMs (Deepseek, Gemma, QWQ), **identifying** significant robustness gaps in negation tasks
- **Benchmarked** models using the **MMT4NL framework**, **discovering** that **QWQ (32B)** achieved **91.2%** fairness accuracy, outperforming GPT-4o (84%) and Gemini-2.0 Flash (86%)
- **Analyzed** adversarial perturbations (Fairness and Negation) to **assess** system reliability, providing critical insights into open-source model deployment

PROJECTS

Health Consultation Chatbot – Graduate Project

- **Developed** a cross-platform mobile application using **Flutter** to provide automated health consultations and preliminary self-diagnosis
- **Integrated** multiple medical information APIs to enhance response accuracy and ensure the chatbot provides reliable health advice

AI Travel Planner Web Application – AI Course

- **Built** a dynamic travel planning web app using Streamlit that generates personalized itineraries based on user-defined constraints
- **Designed** and implemented intelligent input systems for destination, budget, and preferences to optimize the AI's recommendation logic

Student Job Matching Web Application for CSIT Students – Internet Programming Course

- **Developed** a Full-stack job matching platform using **HTML, CSS, JavaScript, and PHP** for CSIT department recruitment
- **Engineered** a secure administrative module for instructors to perform **CRUD operations** on job postings via a **MySQL** database

TECHNICAL SKILLS

- **Programming:** Python (Pandas, Scikit-learn, PyTorch/TensorFlow), JavaScript (Node.js), PHP, Java, HTML5, CSS3
- **Frameworks & Libraries:** Flutter, Streamlit, Bootstrap
- **Tools & Database:** Jupyter Notebook, Docker, Jenkins, Git, Ollama, VS Code, MySQL
- **AI & Machine Learning:** Large Language Models (LLMs), NLP (BERT, RoBERTa, BART, T5), Prompt Engineering, Data Pipeline (ETL)

SOFT SKILLS

- Effective Communication, Adaptability, Analytical Thinking, Problem-Solving, Growth Mindset & Self-Learning, Time Management

EDUCATION

Bachelor's Degree in Computer Science, Faculty of Science

Jun 2022 - Apr 2026

Naresuan University, Phitsanulok

- **GPA:** 3.25

Upper Secondary Education, Science-Mathematics Program

Apr 2019 - Mar 2022

Bunyawat Wittayalai School, Lampang

- **GPA:** 3.19
